THE REDCLIFF REVIEW

THURSDAY, SEPT. 2nd. 1938

Number 15

## An Interesting Forecast Events By Mr. Strange

Gives Weekly Information  
On World of Wheat

The shadow of "The Four Horsemen" of the Apocalypse is falling upon us. The characters are being groomed, saddled and equipped to spread war, hunger, death and destruction.

Should these evil forces be loosed, then the young men, under flying banners and to the strains of martial music, will march bravely to battle. But soon they will find that their flesh is but a poor shield against hurtling jagged steel splinters. They will know the hard choking and blinded death from poison gas. They will experience the gripping dry-throated ghastly fear as their companions before their eyes become piles of torn and shattered flesh and bone. Then will see once happy homes and gardens made into heaps of muck and rubble.

At home little children will tell, with pride, of the brave deeds of their gallant soldier fathers, but in quiet places dry-eyed gentle women will mourn their lost men, and will look to a future shattered and empty of hope.

Finally when "The Captain and the Kings Depart", there will limp pathetically across the country the burnt-out veterans, trying in vain to reanimate himself in a busy world that somehow has forgotten him. Then for farmers the aftermath of low prices. "A measure of wheat and three measures of barley for a penny", the Scriptures tell us.

Yet throughout the ages has ever rolled the clear but unheeded injunction to man—Share the fruits of your toil and of your lands freely with those in need—or suffer war.

How sad, how pathetic how STUPID it all is.

Following factors have tended to lower price—French threatening returns exceed earlier expectations—Russia makes large exports of barley and wheat—Prairie wheat crop confirmed well over 300 million—Showers in Argentina and Australia—International Institute estimates Italian wheat production at 294 million—France offering soft wheat for shipment to England.

## New Laws Now For Riding on Bicycles

Parents Should Inform Their Children About Rules

Notice has been given in daily papers during the past week about tariff bylaws by juvenile bicycle riders and the parents are given notice to advise their children.

In the light of the increasing numbers of accidents to young bicycle riders, some more definite steps must be taken to protect children against if their parents will not assume their oversight. There are new laws now about stopping bicycles at street corners the same as automobiles, and while the same law applies to towns and villages, all children should be given instructions to be careful.

## TOURIST DOLLARS SPELLS PROSPERITY

Tourist dollars are the healthiest spent in any country, declared D. L. Dolan, of Ottawa, director of the Canadian travel bureau when addressing a recent meeting of directors of the Alberta Motor Association.

Mr. Dolan visited the province while in the course of a western tour for the purpose of contacting members of motor clubs, touring organizations and representatives of provincial governments.

Emphasizing the importance of the tourist traffic Mr. Dolan said that tourist dollars are spent for the employment of services in the country and the purchase of goods. Whether the resident is a bookbinder or a farmer, he benefitted from the tourist trade.

Just as soon as the tourist crossed the border into Canada, he became a member of the consuming circulation and a non-resident taxpayer, said the tourist chief.

Mr. Dolan stressed the need of well conducted highways. If the tourist trade was going to expand in this country, he thought that these responsible for road building in the west were doing a good job with the available funds.

Mr. Ralph Hargrave, who has been holidaying at Vancouver for the past several weeks, returned to his home here on Saturday.

Mrs. R. S. Hodge arrived in town on Saturday to visit her sister Mrs. R. C. Hargrave for a few days.

Mrs. W. Campan and Mr. Ray Strobel motored to Maple Creek on Thursday to visit their brother, Mr. Herb Strobel and the family.

Mr. Lehr, a market gardener of Medicine Hat, left for Wetaskiwin last week with four tons of water melons, grown on his own land. The banana belt is just around the corner from sunny Southern Alberta.

Owing to the greatly increased demand for sealers this year, the Dominion Glass Factory here is shipping direct from the lake. The ware house stock has been completely depleted.

## SCHOOL NEWS

The Redcliff School Literary Society is now in full swing. They held their second formal meeting for this term in the school auditorium on Friday, September 16. A new cleanup committee was elected consisting of Ruth Lien, Bessy Gordon and Cyril Worke. Following this the editor, Debra Buchholtz read the first edition of the Redcliff School Literary Glossary which was enjoyed by all. May Martin then thrilled the Society by singing a song which was certainly praiseworthy. She was accompanied on the piano by Doreen Cooke.

Next, the first of a series of spelling matches was held, the Grade Eight taking part. The best spellers in the class were found to be George Broughton, Edna and Edward Martin and Muriel Brydie. The second meeting adjourned leaving each member strongly aware that they are off to a good start for the approaching year.

Town workmen are busy these days dismantling the old swimming pool and re-erecting the skating rink equipment to the new site on 4th Street.

Mr. Alex MacKenzie, former manager of the Imperial Bank here, was a visitor in town on Monday. He was accompanied by his son, Stuart.

Friends of Miss Doris Miller, who with her parents visited here early in the summer with her grandparents Mr. and Mrs. C. A. Benjamin, will be interested to learn that she was married recently in Los Angeles to Fred W. Dickson. Three hundred friends witnessed the ceremony. Just as the bride's parents, Mr. and Mrs. A. H. Miller, after a short honeymoon at Lake Elsinore the young couple will make their home in Los Angeles.

## Saving and Credit Union Limited Meeting

Was Held Monday Evening in The Town Hall

A meeting was held on Monday night in the Town Hall at which an interim report on progress of organizing was presented. A sub committee was elected to prepare Supplemental By-Laws and to serve as information bureau.

The objects of a credit union shall be the promotion of co-operative enterprise among its members and the creation of a source of credit for its members, at legitimate rates of interest, exclusively for provident and productive purposes and merchandising purposes.

Mrs. Allanbach was the hostess at a pleasant afternoon tea last Wednesday. Cards were played and dainty refreshments were served on the lawn. Mrs. Hulburt and Mrs. E. Podesta were on the honours.

Mr. R. C. Hargrave, D.D., GM of the Masonic Lodges in this district paid an official visit to the Lodge at Mayberry last evening. A number of members of the Redcliff Lodge accompanied him.

Mrs. Fox, Provincial Deputy Grand Officer of the Redcliff Lodge attended a meeting of the Lodge here last evening. A number of members from Medicine Hat were present and an enjoyable evening was spent.

Miss Zelda McKay, who has been a patient in the Edmonton University hospital for several months following an attack of infantile paralysis, returned to her home here on Sunday. She will be at home for three months before returning to Edmonton for further treatment.

## Champion Crested Wheat Raised at Tilley

By a Farmer Who Came From Denmark Few Years Ago

Mr. Soren Petersen, who came to Canada from Denmark in 1928 is now a farmer on 160 acres located just Southwest of Tilley in the Eastern Irrigation District. Today he is the world champion grower of crested wheat grass on the farm which he purchased in 1931.

This year he has produced a 39 bushel per acre crop of Marquis wheat in addition to the usual outstanding crops of peas, barley, alfalfa and crested wheat grass.

## Mrs. H. C. Duffield Met With Accident

Had Her Arm Cut When The Car Glass Broke

Mrs. Kenneth Duffield met with an accident on Sixth Ave. Medicine Hat on Tuesday. The car in which she and her husband were driving was struck by another car as it was turning into the Central Garage. The driver claimed he did not see the Duffield car on account of the blinding sun at the time.

Mrs. Duffield was thrown against the front door and received a cut on her right arm from the broken window glass. She was taken to a doctor's office where she was attended to and later taken to her parents' home where she has been since.

Following factors have tended to raise price—Fear of war in Europe—Reports indicate further Italian crop deterioration—Estimates substantial Dutch import requirements of wheat, corn, barley, rye and oats—Rains needed for ploughing and seeding in Russia and Balkans—Much Russian wheat infected with wheat bug—Sharp reduction in Chinese peanut exports—Mediterranean oil production low.

## Memorial Window For Banff Church

Inspired by the beauty of the Canadian Rockies, and the sweet tones of the bells of St. George's Church, Banff, Alberta, Miss Jean Van Brunt of Brooklyn, New York, has presented the church with a memorial window which she designed and made herself. The window embodies the idea of the Church bells as angels or God's messengers sending inspiring invitations to worship. It was placed above the main entrance and is in memory of the late Canon Henry Montgomery, M.A., rector of this church from 1921-24, previously rector of St. Peter's Church, Kingston, N.B., and Canon of Christ Church Cathedral in the diocese of Fredericton, N.B., also rector of St. Barnabas Church, Calgary. He served in the C.E.R. from 1915-18, being chaplain of No. 14 Canadian Hospital at Scarborough, England. He died at 78 on July 9, 1933.

St. Rev. I. Ralph Sherman, M.A., Litt. D., Bishop of Calgary, recently dedicated the window. The bells which inspired Miss Van Brunt were donated by Mrs. Robert West, Lieutenant Governor of Alberta in 1923, later bishop of St. Rev. Cyril Phipps, D.D., D.C.L., late Bishop of Calgary, in 1927. Rev. Canon Tully Montgomery is the present rector.

## Report Given From Secretary Of Swimming Pool

Swimming Pool Donations

Medicine Hat Rotary \$250.00  
Dominion Glass Co. \$200.00  
N. Meldrum Gas Co. \$50.00  
Pressed Brick Co. \$50.00  
Town of Redcliff \$125.00  
Other donations, ranging from 15.00 to 10 cents were received.

On the following—  
a Macdonald's Consolidated Boy's Wholesale  
Ogilvie Flour Mills Ltd.  
Standard Brands, Calgary  
Tee Store, Medicine Hat  
Lake of the Woods Milling Co.  
H. O. Duggan and Co.  
Dominion Fruit Co.  
J. J. Moore and Son  
Blair's Taxi

Medicine Hat Baking Co.  
E. N. Dawson, Redcliff Review  
Medicine Hat News  
A. D. Irvine, Mrs. Steele  
M. Ouy, C. Beny, Rev. H. V. Ellison, H. Shesby, Redcliff  
Dance, Redcliff Baseball Club  
Youth Training School, Redcliff.  
Total \$784.00

Donations in labor and material were made by the Dominion Glass Co. and the Town of Redcliff. Material was also donated by the Dominion Glass Co. and the Pressed Brick Co. and the Premier Brick Company.

I have been requested by the Executive to appeal to the public to support the Rotary Carnival commencing next week-end. You can all see the value of their organization by the above contribution.

Thanking you for your wonderful effort.  
Yours Respectfully  
B. Allison, Secy. Treas.  
Redcliff Swimming Pool Assoc.  
P. S.: A full financial statement will be announced next week.  
B. A.

Mrs. Robt. Johnson and her two children left on Monday for Edmonton, Mirror and other relatives where they will visit with relatives for a couple of months.

Condon Memorial Ladies' Aid will hold its Anniversary fish and ship supper in the basement of the Church on Monday, October 10th from 5 till 7 p.m. Adults 15c children under 12 years 10c.

Mr. Dobson, of Vancouver was in town this week on business in connection with the Dominion Glass Co. He motored from the coast accompanied by Mr. Leonard Henderson, formerly of Redcliff, but for the past year a resident of Vancouver.

"You're going on a long journey ... EAST!"

## The Eastern Industrial Worker is one of the West's Best Customers

That tearful cow will have lots of company on its long trek East: 175,704 other head of cattle for instance, 21,144 calves and 41,557 hogs — these figures representing Eastern consumption of Western livestock in 1936. Besides these huge shipments on the hoof, Eastern industry consumed more than 80,000 tons of Western fresh dressed meat; 10,000 tons of butter, 6,000,000 pounds of poultry and over 50,000,000 eggs; the whole bringing

a total revenue of over \$40,000,000 to the Western producer.

The Eastern industrial worker is one of the West's best customers, but he can remain so only when actively employed. Your purchase of a Canadian-built car helps keep him, and his fellow-workers in the parts, steel, paint, glass, chemical and other industries — on the payroll, puts them all in a position to buy more of your goods.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lansden Building, Toronto.

**AUTOMOTIVE INDUSTRIES OF CANADA**

WORLD HAPPENINGS  
BRIEFLY TOLD

King George VI. unveiled a memorial to his father, King George V. in Cribble parish church, near Balmoral castle.

A new transcontinental speed record for planes was met when Major Alexander V. De Vere flew from Los Angeles from New York in 30 hours, three minutes, seven seconds.

The five occupants of an Australian aircraft were killed when the pilot averted to avoid a tractor and the plane crashed in a cane field near Inland airport.

Seventy cases of poliomyelitis have been reported at Alberta this year, all but 11 of them since July 5. Dr. R. M. Dow, Alberta's deputy minister of health, said.

W. W. Lynch, farmer near Westbourne, Man., 72 miles northwest of Winnipeg, reported his April wheat yielded 40 bushels to the acre. The rest-resistant output from 3½ acres was 140 bushels.

Prof. W. Thompson, veteran prospector, left for Toronto after a brief stop at Edmonton, during which he declared his new gold mine was the most promising yet made in the Yellowknife, N.W.T. field.

Mrs. Robert Campbell of Nesbitt, Man., died at Souris, Sask., after a long illness. She was 72 years old. She was succeeded by John Gordon, parliamentary secretary to the ministry of labor.

Three years ago Floyd Richardson of Kelchum, Idaho, saw a brightly glittering object in "Trail creek, did not bother to investigate. This summer he noticed it again, took time out for a closer look. His reward—a 200-pound bar of silver worth about \$1,300.

## Human Carelessness

Is Seen As Major Cause Of Disaster Forest Fires

The Christian Science Monitor's Travel Editor, just returned from the interior of British Columbia, reports that even that hitherto untamed country has been severely ravaged by forest fires during the present dry summer. Human carelessness causes these disastrous fires which, because there is no organized force to combat them, spread over thousands of acres until they reach a natural barrier.

Writing in the New York Times, Paul Duval blames these fires in the main on carelessly discarded cigarettes or matches, and points out that the destruction of priceless forests is but the side issue.

"With them will go innocent wild animals. Streams will dry up and poison literally tons of game. Furthermore, the reckoning of forest fire is not to be limited by immediate damage. The changes which it causes in one section may be reflected hundreds of miles away in droughts, floods, and migration of people, as has recently happened with coyotes moving into the great Alaskan forest country because of desolation of their Canadian ranges by fires."

Late summer and early fall are times for redoubled watchfulness on the part of campers and tourists, and a good time to refrain from indulgence which often prove so costly.

## Rapid Work

Fortifications For Defense Are Erected In Six Hours

Karl P. Billner, a Swedish inventor, built in six hours a concrete defense fortification which army officials said could have been constructed by ordinary methods in no less than two or three days.

The inventor used a suction process, by which water and air were drawn off the machinery as they were poured. This caused rapid drying and hardening, and also allowed an atmospheric pressure of 1,000 pounds per square inch on the wet concrete.

## Really Want To Know

"There's an old New York joke: 'What famous person is buried in Grant's Tomb?' It says many a man that he's buried in Grant's Tomb." "I get people in here from Canada and Europe sometimes," he said, "who ask me right off the bat, 'Who is this famous man that's buried here?' They've never heard of General Grant."

One man's meat is another man's poison, and your telephone is another man's wrong number.

## NEW GOVERNOR

Sir Harry Luke, C.M.G., recently appointed Governor of Fiji and Commissioner of the Western Pacific, photographed on the Empress of Canada at Quebec en route across Canada to his new duties. Sir Harry has just completed a term as Lieutenant-Governor of Malta.

## Ancient Lore In North

Flinds Traces Of Primitive Man In Northern Hinterland

Discovery of large mountain caves in Canada's northwest wilderness has led to evidence of habitation by primitive man thought to have migrated from Asia thousands of years ago was reported at Edmonton by Dr. Wesley L. Bliss, University of New Mexico archaeologist.

Dr. Bliss, who returned from a five-month expedition in the north-east, said his findings add much strength to a widely-accepted theory that America's first inhabitants reached the continent across the Bering Strait and thence southward down turbulent rivers to the Mackenzie, said the discovery of the mountain caves would remain a secret until he returns to them next year.

Dr. Bliss said his more thorough excavation, but he added that what he believes to have been dwellings of primitive man were found in two widely-separated areas visited by the expedition.

In the 2,400-mile journey with five college students, Dr. Bliss travelled by canoe from a lonely settlement in northern British Columbia northward down turbulent rivers to the Mackenzie, said the discovery of the mountain caves would remain a secret until he returns to them next year.

Seasoned in archaeological research in China and Mexico, Dr. Bliss came to Edmonton last winter. He remained there for several months investigating clues in northern Canada to the ancient northward trek for traces of the ancient northwest passage believed to have been travelled by primitive man.

Dr. Bliss said the expedition uncovered definite proof a clear corridor for migrating man existed throughout the ages from the Bering Strait, across Alaska to Alaska.

"Information supplied by an Edmonton newspaper aided discovery of the cave formations," the archaeologist said. The newspaper's facts were obtained more than five years ago in an interview with Ed. Clausen, inmate northland prisoner. Valuable relics found by the expedition in caves and other archaeological formations shipped to the University of New Mexico.

They include roughly-chipped stone weapons and cooking utensils and a precious fragment of an aged basket weave.

Dr. Bliss found a preserved elephant tusk on the shore of the Arctic ocean.

"There's no doubt that elephants and mammoths roamed the region thousands of years ago," the professor said.

## Prefers Isolation

Foreigners Not Encouraged To Enter Canadian Frontier

Claiming to have been shot up in a Chinese city for days until a messenger was dropped over the wall and sent to seek help, a Chinese man said they kept their country isolated from the rest of the world.

"They give no encouragement to foreigners to enter China," said Mrs. Shants, making her 14th address since May 1. "China is a big country and produces everything necessary for a people to live on. This is what makes the inhabitants so independent. For thousands of years, city gates were actually closed to keep the foreigners out."

Chile introduced alfalfa hay to California in 1864.

## International Air Traffic

Canada Needs Terminal Rights In The United States

There is another development which is drawing the United States and Canada more closely together besides the great new bridges erected making for a greater flow of international traffic. Canada is negotiating with the United States on behalf of the Trans-Canada Airlines for the terminal rights and privileges in the United States for the United States lines flying in Canada. Hon. C. D. Howe expects a successful issue of the negotiations without much difficulty.

At the present time American lines terminal rights in Vancouver, Winnipeg and Montreal. Toronto will be coming along only in the near future when the airport there is completed. Only one Canadian airline has a base in the United States and that is in Montreal on the route from Vancouver. Also expected that Buffalo and Detroit will be the first terminals for Canadian use in this part of the continent.

In the next twenty years, if the last ten any criterion, there will be a wonderful development of transportation between the two countries, and it is only fair there should be reciprocal advantages on both sides of the line. In this respect it cannot be overlooked that Canada, provides the great Westland ship canal toll free for United States boats.—St. Catharines Standard.

## Something Of A Paradox

Manner In Which Chromium Protects Steel From Rusting

Stainless steels owe their resistance from the addition of chromium to the iron from which it is made. And the manner in which the chromium protects the steel from rusting is a little to like it. Make one deal with high nickel and low chromium. And see a lower-nickel steel with a shorter life span.

When iron is coated with chromium, the chromium will complement other chromium. Don't you adore the high curved water? And don't you adore that action plant in the skirt, especially those "flocks" in style? Billions of flowers, ruffling and the belt are plenty to touch. For the making of our diagram hints at how simple it is.

Pattern 4832 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16, entire ensemble, takes 5 yards 39 inch fabric.

Bent twenty cents (20c) in collar (clasp cannot be accepted) for this Anne Adams pattern. Write plainly to Anne Adams Pattern Dept., 117 Madison Ave. E., Winnipeg.

## Dope Addicts

Scotland Yard Worried Over Increasing Use Of Narcotics In England

Scotland Yard, disturbed by evidence of increased narcotic addiction in London and other large British cities, is searching for the source of the narcotics, which go into the British equivalent of a reefer.

Police report the old-fashioned Red Optum den has become a new model and has been replaced by the resort in which patrons lie on trestle beds and smoke marijuana cigarettes.

Authorities at first believed the drug—once a worry to Canadian authorities—is being grown and distributed by a syndicate using garden of country houses.

Neufers are said to be on sale at several Boho cafes, at West End bars and night clubs and in some dockside restaurants. They have been found in Liverpool, Hull and Glasgow.

## U.S. Navy Program

Fast Pace Of Warship Building May Be Continued

The United States navy, anxious to continue the present fast pace of warship building, has begun preparation of a 1939-40 program which officials say will comprise at least 18 fighting ships.

The program will be submitted to the next session of Congress, beginning in January. It calls tentatively for two battleships, two cruisers, eight destroyers, six submarines, and possibly one new aircraft carrier.

"An indication that the army as well as the navy would have an enormous program ready for the next Congress has come from War Secretary Woodring, who said 'much rearmament is to be done before we can consider our army thoroughly modernized.'"

## Gave Him Red Thread

A young man who has been in Germany for some time has had his most thrilling experience, on his own say-so, since returning to the United States. He flew from Cleveland to Detroit across part of Canada, and there wasn't a pursuit plane in sight. That's the sort of thing that couldn't happen in Europe," was his comment.

## GALA FOR AUTUMN AFTERNOONS

By Ann Adams

## Has Been Using Telephone

Over Long Distance Cleveland Man Aids Opinions On Peace

Since 1908, O. C. Piccus, of Cleveland, the Mapote Oil Co. of Cleveland, has pleaded for peace by long-distance telephone with at least 35 diplomats in London, Berlin, Rome, Paris, Geneva and Washington. His bills for trans-Atlantic communication have amounted to \$2,000, writes King Key in the New Yorker. The biggest moment came when he put through a call to Adolf Hitler in Berlin. Apparently not even a layman would have been able to tell him, when he said, "Now you would that he?" Anyway, Hitler grabbed the phone and said "Hello!" Mr. Piccus was elated. "Is this A. Hitler?" he cried. "This is A. Piccus of Cleveland, Ohio, U.S.A. I have an average American mind. I was wounded in France with the A.E.F., and I'm interested in peace. What do you think of a general election in Spain to settle the war?"

Hitler at this point had the call switched to Baron von Neurath in the Foreign Office. Mr. Piccus returned to Cleveland to find that the Baron von Neurath had replied, "I would not want to commit myself on the subject of war. Mr. Piccus must talk to him." "In the next war Germany will be wiped off the face of the earth." After that, he heard a click and understood that Von Neurath had hung up.

Mr. Piccus later carried his suggestion to General Franco, whom the overseas operator knew. He also got through to Count Ciano in Rome. Ciano, Rome's Foreign Minister, Mr. Piccus asked him to withdraw Italian troops from Spain.

Mr. Piccus has been successful in his efforts for his efforts. He has been responsible for would be a considerable sum for his efforts. He has been responsible for would be a considerable sum for his efforts. He has been responsible for would be a considerable sum for his efforts.

Mr. Piccus called Anthony Eden in Geneva to discuss events in Palestine, and was amazed when Mr. Eden's secretary cut him short while he was criticizing Mussolini. Soon afterwards the Cleveland District Attorney's office suggested to Mr. Piccus that he desist, telling him truthfully that he could be fined \$5,000 and sent to prison for three years if, as a private citizen, he negotiated in any way for a treaty with a foreign country.

Mr. Piccus suspects the action was precipitated by the State Department, but he didn't let it bother him—just kept right on telephoning, calling and letter-writing. He can't say whether he could affect him, but he doesn't negotiate," he says. "I just give an opinion."

## Took Full Responsibility

How Adams Knew Way Home

Mr. Piccus, who was in the Lake Superior and North Channel sections in that year took a catch which was a good one. He was employed to 187 men.

During the same period there were 20,000 whitefish fry placed in the waters of those two sections along with a quantity of lake trout fry and fingerlings—Daily Staff Daily.

## Designed Beautiful Candles

Those Made By Ajello Brothers Were No Ordinary Kind

The art of making candles is centuries old. They were not always made of fatty materials and they did not become cheap enough for general use until about 100 years ago.

There died in New York recently Antonio Ajello, the senior partner of the candle firm of Ajello Brothers, who had been making candles at a Long Island factory nearly 50 years. But the Ajello family had made candles at Sorrento more than 100 years before that. Antonio Ajello's father emigrated from Italy to New York in 1849.

They were for Roman Catholic churches, shrines, temples and for domestic use. In the half-century the Ajello brothers produced over a billion candles. The brothers were great artists. They were artists, sculptors. They designed candles distinctive to every order that was given. The Ajello made candles for the Vatican and great cathedrals and churches all over the world. They made candles for kings and presidents and presidents for great stars of the opera, the stage and screen, for use at public occasions.

When a famous dinner was given at Washington on one occasion the 172 candles on the tables were designed in the form of the Washington Monument. Ajello made candles that sometimes took months to make. He made candles that produced different colored flames and he had a secret process by which his candles gave forth a perfume of roses. For his largest and most artistic creations he received as much as \$10,000 for a single candle.—St. Thomas Times-Journal.

## Fisheries Work

Figures From South Sea Islands Show Importance Of Industry

Some of the most valuable fisheries known to this part of the country is indicated in the report on the Ontario Department of Game and Fisheries for the year ending March 31, 1937, which has just been issued.

It shows, for instance, that the Lake Superior and North Channel sections in that year took a catch valued at \$6,000, while they gave employment to 187 men.

During the same period there were 20,000 whitefish fry placed in the waters of those two sections along with a quantity of lake trout fry and fingerlings—Daily Staff Daily.

## Royal Effigies

Queen Mary Commissioned Sculptor To Do One Of Herself

Queen Mary has commissioned Sir William Reid Dick, the famous sculptor, who is now completing the tombstone with recumbent effigy of King George V, to prepare a similar effigy of herself. At her wish both are to be done in pink alabaster, a very unusual medium for modern sculpture. Difficulty is being experienced in obtaining a sufficiently large block of this rare marble to fulfill the design of the effigy. It is quarried mostly near Derby, England, and a search is being made there. It is hoped some day to find the tombstones within the next year.

Requires Home Shift

Grouse shooting is not as easy as it looks, says News of the World. A grouse rises almost perpendicularly off the ground, and it is quivered an elevation of from 15 to 20 yards. The time to shoot is when it makes a turn, and it is then that the grouse is hit by the gunner, at the moment of the pause from the perpendicular to the reclining.

The little village of Bletworth, England, has voted unanimously to have its streets named after the names of the streets in London.

The source of the Thames river is a tiny spring in the Cotswold hills.
